

ROCKPORT ACQUIRES CONTROLLING INTEREST IN COMMERCIAL MORTGAGE LOAN ACCOUNTING BUSINESS

The Rockport Group (Rockport), the leading provider of commercial mortgage lending and asset management software, has acquired a controlling interest in MBS Mortgage Systems, Inc. (MBS). MBS has developed *Versara*® an accounting software solution for financial institutions that invest in commercial mortgage loans. MBS will change its name to Rockport Solutions, LLC (Rockport Solutions) and operate as a business unit of Rockport.

"We are excited about this business extension for Rockport into adjacent markets," said Rick Trepp, Chairman of Rockport. "Adding *Versara* to our product suite will allow Rockport to provide our clients with a full set of commercial mortgage products and will set Rockport apart from its competitors," Trepp said.

"Our goal when we started MBS was to create a complete Front-to-Back Office solution that would work for all companies investing in commercial mortgages. The relationship with the Rockport team provides the perfect match for us to meet our goal," said Joseph Daddario, President of Rockport Solutions.

About Rockport

Rockport, founded over a decade ago by Rick Trepp (Founder of Trepp, LLC), is the recognized industry standard provider of a SaaS solution for commercial mortgage loan origination, underwriting, securitization and asset management. Rockport provides a securely hosted, configurable off-the-shelf system that provides a robust infrastructure and analytical toolset for loan sizing and underwriting, pipeline tracking, loan and portfolio-level reporting and analysis, and performance tracking. Today the platform is widely used by banks, investment funds and life companies for the origination, securitization and asset management of performing and non-performing loans and REO.
